

Simplant® Planning Service

A shared vision builds trust and confidence

Precise crown-down implant planning avoids clinical and prosthetic complications and gives predictable results – something your patients long for. By involving patients in the treatment planning, you not only help them understand the treatment but also create a real sense of comfort and confidence in the procedure.

With Simplant Planning Service we can work together to accurately plan your implant treatment so you can confidently place implants with a patient-specific surgical guide – designed by us, approved by you.

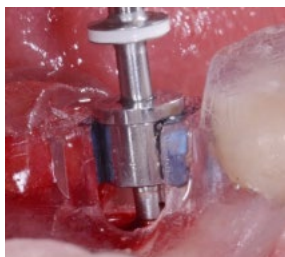

Excellent results rely on precision planning

Combining a CBCT and a digital impression with Simplant Planning Service, available anytime and anywhere, you can review and adjust the plan to place your desired implant into the perfect position. And to give you the accuracy you require for turning the virtual into reality, we provide a fully patient-specific Simplant Guide that puts you in total control.

Your entry into the Digital Implant Workflow

Empowering you with the tools needed to easily plan and safely execute a surgery, Simplant Planning Service offers a smooth entry into the world of implant treatment, as well as facilitating more complex cases.

An integral part of Dentsply Sirona's Digital Implant Workflow, you can rely on an experienced partner to build your dental business. Receive behind-the-scenes support, while staying in control of your implant planning cases.

Flexibility to support your preferences

The open integration of our implant planning service allows you to tap into the most advanced dental technologies on the market, from the choice of scanners to the implant

systems used. Either outsource the manufacturing of your Simplant Guide or produce the guide quickly and easily within your practice by printing the Simplant Guide File. Whatever your preference, you can place Dentsply Sirona implants fully guided, which ensures the highest degree of clinical safety.

“For me it’s the easiest, most streamlined software for improving my treatment planning.”

Dr. Mark Ludlow, DMD, MS, Prosthodontist
Medical University of South Carolina. USA.

Simplant SAFE Guide with lateral access – for improved accessibility

The optional lateral access provides greater ease of handling even for cases with limited inter-occlusal space*. This allows for treatment of an expanded range of indications and increased patient comfort and satisfaction. Just one of many Simplant Guides for confident implant placement.

* Unique for Ankylos, Astra Tech Implant System EV and Xive implants.
