

Better Faster Safer Endodontics

Saving the natural tooth just got easier—Veterinary Niti reciprocating files now available in 45mm and 70mm!

VET Flex&Preserve™ Nickel Titanium Reciprocating Files

Better, faster, safer results*

VET Flex&Preserve™ files—the first endodontic reciprocating NiTi files from the global dentistry brand you know and trust.

- Designed specifically for the veterinary patient
- Quickly and effortlessly instrument the pulp chamber and root canal through the fracture site
- No additional access needed
- Now available in 45mm and 70mm lengths.

*Internal results, tested in 3D printed teeth and extracted ones; compared to manual files.

45mm length

70mm length
