 K A P P L E R

# Dental Cabinetry

The Dentsply Sirona line of Intelligent Dental Cabinetry is fully-customizable, and can be configured to meet the workflow preferences of any practitioner, and the layout and space considerations of any operatory.

# Surround yourself with the intelligence of an ergonomic and efficient operator

## Integration

Elegant integration of Dentsply Sirona Treatment Centers

Dentsply Sirona Kappler cabinetry complements the entire line of Intelligent Treatment Centers, transforming any operator into a streamlined, fully-integrated treatment suite.

## Design

Ergonomically designed for optimal efficiency

The contemporary look of the cabinetry is designed to match harmoniously with the Treatment Center, while also providing optimal ergonomics for clinician health and overall practice efficiency.

## Experience

Everything in its place, exactly where it should be

Kappler cabinetry promotes a clutter-free environment, simplifying set-up and saving time setting and resetting rooms from one patient to the next.

# Genova

## Treatment Stations

### Integration

Compact yet fully-featured, Genova can fit into any existing operatory with no need to move walls. Rear and side stations integrate seamlessly with Intego, and the rear assistant element allows for two- and four-handed operation.

### Design

Rear station, with its egg shaped working surface, is carefully designed to serve as support for the assistant. This seamless combination ensures that all materials are within easy reach during treatment.

### Experience

Side station allows for peripheral equipment storage and use, while the sink is located optimally for patient communication.

# Componera

## Treatment Hub

### Integration

The rear hub is ideally suited for open space operatories and integrates well with the larger footprint of Teneo. This hub is floor standing for easy integration into any operator.

### Design

Seamless sink, flat surfaces, and minimal openings facilitate infection prevention, while the clean look and pure lines are a perfect complement to Teneo.

### Experience

Ample tub and tray storage, with shallow dispenser over the sink to minimize head bumps. Expansive amount of useful surface expands the treatment preparation area.

# Athen

KAPLER

# Treatment Hub

## Integration

Seamless integration of the Teneo concept with CEREC®, cone beam imaging, implantology and endodontics.

## Design

Designed to be hung on the wall and float above the floor, the modern, clean lines of Athen cabinetry is the ultimate match for Teneo's simple and efficient design.

## Experience

Keeps everything hidden yet within easy reach for an uncluttered, calm and comfortable working environment. Floating cabinetry makes it easy to clean underneath, and the egg shaped working surface is the ultimate in ergonomic form and function.

Since 1947, Kappler Furniture has been designing and producing many of the world's premier office and medical cabinets. In the serenity of Germany's Black Forest Region, Kappler Furniture has set the benchmark for quality and design for all other cabinet manufacturers to follow.
