Recommended Meta-Description: With SureSmile® Clear Aligners, you can achieve professional results with your doctor. The smile you've always wanted is closer than you think. Learn more!

Get the Smile You've Always Wanted

Feeling confident in your smile is important for your overall happiness and self-esteem. We are here to help you achieve the smile you've always wanted in a way that works for you.

Did you know that straightening your teeth has benefits beyond cosmetic improvement? Misaligned or crowded teeth can make maintaining hygiene difficult, which may lead to oral health problems. Crooked teeth and bite problems can sometimes lead to:

- Tooth damage and chipping
- Tooth loss
- Wearing away of tooth enamel
- Difficulty speaking or chewing

In addition to giving you the beautiful smile that you deserve, straightening your teeth may reduce the risk of cavities and help prevent gum disease.

Your Journey to a Confident Smile Starts with SureSmile® Clear Aligners

Clear aligner technology has made orthodontic treatment more discreet, while moving teeth to create a healthy, beautiful smile. Unlike traditional metal braces which rely on brackets and wires, SureSmile® straightens teeth through a series of clear, comfortable,

removable aligners. You can expect to wear your aligners for 22 hours each day and change them every two weeks as you progress through treatment. Each set of aligners will put gentle pressure on your teeth to gradually reposition them until your smile reaches ideal alignment.

Is SureSmile® right for me?

SureSmile® Clear Aligners can effectively treat bite problems, including:

- Crowding
- Gaps between teeth
- Underbite – when all the upper teeth sit behind the lower jaw
- Overbite – when the upper front teeth cover part of the lower front teeth
- Crossbite – when one or more upper teeth fit inside of the lower teeth

How long will treatment take with SureSmile® Clear Aligners?

Treatment time will vary based on your unique smile and goals, but generally lasts anywhere from 6 to 18 months.

Can I eat and drink while wearing my SureSmile® Clear Aligners?

Great news – you don't need to give up your favorite foods while you're in treatment! However, you do need to remove your aligners when eating and drinking all liquids except for cool water to retain their fit and prevent discoloration. Simply remove your aligners to eat and drink all the foods and beverages you typically enjoy, then brush your teeth before putting your SureSmile® Clear Aligners back in place.

The Right Fit: Why SureSmile® is a Trusted Option

As dental technology evolves, so does our practice and we are proud to offer SureSmile® Clear Aligners to our patients. Advanced treatment planning and proven materials combine to give you a personalised plan with predictable results. 750,000 patients have trusted SureSmile® technology to straighten their teeth.*

Getting Started with SureSmile® Clear Aligners

1. Your first appointment: We will take photos and a digital scan of your teeth to assess how clear aligners will work best for you.
2. Developing your treatment plan: We partner with experts in the SureSmile® Digital Lab, evaluating each tooth for optimal movement. Using their proprietary technology, we will develop a customised treatment plan just for you.
3. Begin your smile journey: Get your SureSmile® Clear Aligners and you're on your way to a smile you'll feel confident about. We will make sure everything is on track during routine check-in visits.

Everyone's journey is different, and we want to make the process comfortable and rewarding every step of the way. Let us know how we can support you!

Share Your Smile with the World

After your treatment has ended, we want to help you maintain your new smile and the confidence that comes with it!

- You can use SureSmile® Retainers to maintain your beautiful smile and protect your investment. When used as prescribed, SureSmile® Retainers help keep your teeth in place long after your treatment has ended.

SureSmile® Clear Aligners can give you the smile you've always wanted in a way that works for you. Invest in your smile and yourself!

Your Investment in Confidence and Health

How much will SureSmile® Clear Aligners cost?

The total cost of your new smile will depend on the custom treatment plan we create for you. Our staff can discuss your options with you, including potential payment plans and insurance coverage.
