

CEREC Primemill™ Station

Efficient Organization

THE DENTAL
SOLUTIONS
COMPANY™

The new CEREC Primemill™ Station is a great way to house your new CEREC Primemill™ with added storage!

The cabinet helps to eliminate clutter and provides fast and easy access to essential milling items.

The milling station is also great for noise reduction with its sound dampening lining and sealed gaps. While milling a new crown, close the cabinet lid and doors to reduce the noise.

To keep things clean and organized, the CEREC Primemill™ Station provides room for the self-contained vacuum to remove dust and debris.

The cabinet was designed to provide ventilation and prevent overheating for any integrated components.

CEREC Primemill™ Station features include:

- 1. Sound Dampening**
- 2. Block Storage (Drawer)**
- 3. Water Tank Storage (2)**
- 4. Vacuum Area**
- 5. Additional Storage**

Don't have the new CEREC Primemill™ yet? Don't worry. The new cabinet will also fit CEREC® MCX, CEREC® MC XL or the Inlab MC XL milling unit.
